

9/27/11

Ms. Lavenda has been best known for formulations and production of natural creams. Working with many essential oils for over 14 years I have utilized them mostly for cosmetic applications and personal health issues. For many years I've been selling essential oils of Lavender and Helichrysum to our local community. Due to a growing interest in aromatherapy Ms. Lavenda is going to expand the number of essential oils for sale. Initially, I sell 20 oils (see the Price List below), but soon I will have more. The oils I offer have been purchased from very reputable sources with guaranteed quality, purity and freshness. They are sold in various volumes at reasonable prices. The oils may be tried out at my studio in Cascade or other arrangements are possible. For questions and inquires please call me or send an email.

Barbara Rychlik
